

SECTOR ALPI APUANE - APPENNINO TOSCANO

AVALANCHE BULLETIN - ISSUED AT on 22/11/2023
 by Servizio METEOMONT dell'ARMA dei CARABINIERI
 in collaboration with Italian Air Force Meteorological Service

WARNING - SIGNIFICANT AND/OR INTENSE PHENOMENA

Debolissimi apporti nevosi associati a forte ventilazione, a tratti con caratteristiche di burrasca, hanno determinato nella nottata temporaneo deposito di neve con spessore tra 1 e 4 cm lungo il crinale appenninico tra le province di Massa, Lucca e Pistoia oltre i 1400 metri di quota. Il previsto rialzo termico, unitamente all'irraggiamento solare delle prossime ore, riporteranno la condizione di assenza di neve dalla giornata di venerdì 24 novembre. For further information and details on weather forecasts and conditions please refer to www.meteoam.it

According to EAWS standards Meteomont bulletin is a synoptic-scale system (regional scale). It shall be the user's responsibility to correlate the danger level evaluation of the bulletin with a detailed and expertise analysis of the zonal hazards (single slope), that could be markedly different. Meteorological forecast are issued at UTC (for Italy: in winter time UTC+1; in summer time UTC+2).

Bulletin is subjected to check processes through: the record of Observers and Avalanches and snow Experts data in C-Sifa; the validation by forecasters; the certification by Meteomont Section.
