

Danger Level 2 - Moderate

The strong wind has transported the fresh and old snow.

The visible wind slabs can be released, especially by large additional loads, in particular on steep north facing slopes above approximately 2500 m. Soft weak layers exist in the snowpack in particular on shady slopes.

Snowpack

Danger patterns dp.6: cold, loose snow and wind dp.8: surface hoar blanketed with snow

The snowpack will become in some cases unfavourable. In the last few days visible wind slabs formed especially adjacent to ridgelines and in gullies and bowls. Also shady slopes where weaknesses exist in the old snowpack are dangerous.

Danger Level 1 - Low

Tendency: Constant avalanche danger →
on Saturday 22 02 2025

Wet snow

1500m

Snowpack stability: fair

Frequency: few

Avalanche size: small

Small avalanches are possible in isolated cases.

There is a danger of moist snow slides during the day.

Snowpack

Danger patterns

dp.10: springtime scenario

As a consequence of low temperatures and solar radiation the snowpack consolidated during the last few days.
