

Danger Level 3 - Considerable

Wind slabs and wet snow represent the main danger. Weak layers in the old snowpack necessitate defensive route selection.

The avalanche prone locations are covered with new snow and are difficult to recognise, in particular in gullies and bowls, and behind abrupt changes in the terrain. In starting zones where no previous releases have taken place and on wind-loaded slopes medium-sized and large avalanches are possible. The new snow and wind slabs can be released easily, even by a single winter sport participant,. Whumpfung sounds and natural avalanches serve as an alarm sign.

Snowpack

Danger patterns dp.6: cold, loose snow and wind dp.1: deep persistent weak layer

Large-grained weak layers exist in the snowpack on shady slopes. The new snow and wind slabs are prone to triggering. This applies especially at transitions from a shallow to a deep snowpack, when entering gullies and bowls for example.
New snow and wind slabs are lying on a weakly bonded old snowpack, in particular on shady slopes.

Danger Level 2 - Moderate

The meteorological conditions fostered a strengthening of the snowpack in particular on east, south and west facing slopes.

Outgoing longwave radiation during the night will be good. The surface of the snowpack has frozen to form a strong crust and will soften during the day. A few gliding avalanches and moist snow slides are possible.

Snowpack

Danger patterns dp.2: gliding snow dp.10: springtime scenario

As a consequence of warming during the day, the likelihood of wet loose snow avalanches being released will increase gradually in particular on steep grassy slopes in all altitude zones.

Danger Level 1 - Low

Tendency: Constant avalanche danger →

on Thursday 27 03 2025

Wet snow

1200m

Snowpack stability: fair

Frequency: few

Avalanche size: small

Gliding snow

1200m

Snowpack stability: fair

Frequency: few

Avalanche size: small

Moist and wet snow slides and small avalanches are possible in isolated cases.

Individual small moist and wet avalanches are possible.
