

SECTOR ALPI CARNICHE E GIULIE

AVALANCHE BULLETIN - ISSUED AT on 29/11/2023
by Servizio METEOMONT dell'ARMA dei CARABINIERI
in collaboration with Italian Air Force Meteorological Service

WARNING - SIGNIFICANT AND/OR INTENSE PHENOMENA

La serie di perturbazioni di origine atlantica hanno portato nevicate modeste su tutti i sotto settori delle Alpi Giulie e Carniche, con quota neve a partire dai 1600-1800m. Le nevicate sono state costantemente associate a venti provenienti principalmente dai quadranti meridionali e di intensità da moderata a forte che ha rimaneggiato la neve fresca, creando zone di erosione e zone di accumulo.

Agli escursionisti che prevedono di salire ad alta quota, si consiglia di prestare attenzione ai piccoli accumuli eolici in prossimità di creste, cambi di pendenza e canali. Attenzione va posta anche alle zone ghiacciate. Attrezzatura e abbigliamento adeguato risultano indispensabili.

Sky condition							

According to EAWS standards Meteomont bulletin is a synoptic-scale system (regional scale). It shall be the user's responsibility to correlate the danger level evaluation of the bulletin with a detailed and expertise analysis of the zonal hazards (single slope), that could be markedly different. Meteorological forecast are issued at UTC (for Italy: in winter time UTC+1; in summer time UTC+2).

Bulletin is subjected to check processes through: the record of Observers and Avalanches and snow Experts data in C-Sifa; the validation by forecasters; the certification by Meteomont Section.
