este y norte cercanas a crestas y collados, a las que hay que sumar las que se han formado en caras sur durante este último episodio. Estas estructuras son susceptibles de fracturarse por sobrecargas débiles, como es el paso de un esquiador, provocando aludes de dimensión 2 (mediano) o incluso 3 (grande).

Predicción meteorológica para el sábado, día 1

Pirineo navarro:

Nuboso, muy nuboso o cubierto de madrugada y primeras horas con precipitaciones débiles o moderadas, disminuyendo a intervalos nubosos con apertura de claros en horas centrales. Cota de nieve: en torno a 1200 metros. Temperaturas sin cambios o en ligero ascenso. Heladas débiles o moderadas, persistentes en cotas altas. Viento moderado del noroeste, con intervalos de intensidad fuerte en cotas altas y zonas expuestas, girando a norte y nordeste amainando por la tarde.

Pirineo aragonés:

Nuboso, muy nuboso o cubierto de madrugada y primeras horas con precipitaciones débiles o moderadas, disminuyendo a intervalos nubosos con apertura de grandes claros. Cota de nieve: en torno a 1000 metros. Temperaturas mínimas en descenso, y máximas con pocos cambios. Heladas moderadas, fuertes y persistentes en cotas altas. Viento moderado del noroeste girando a norte, con intervalos de intensidad fuerte en cotas altas, amainando por la tarde.

Datos en la atmósfera libre:

Altitud de la isoterma de 0 °C: 1400 m

Altitud de la isoterma de -10 °C: 3200 m

Viento a 1500 m: N 20 km/h

Viento a 3000 m: NE 60 km/h

Evolución para el domingo día 2

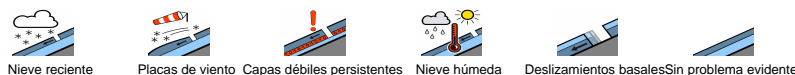

Nivel de peligro sin cambios o en ligero descenso.

(Información elaborada a partir de los datos recibidos de los refugios de Linza, Lizara, Panticosa, Bachimaña, Góriz, Estós, Angel Orús, Cap de Llauset y Belagua, de las estaciones de esquí de Candanchú, Astún, Formigal, Panticosa (lagos) y Cerler, de la estación de esquí de fondo de Llanos del Hospital y de Ordesa Pradera)

Escala europea de peligro de aludes

Problemas de aludes

Nota: Se recuerda que, siempre que haya nieve, la ausencia total de peligro no existe. Hay que tener presente que en circunstancias desfavorables, con aludes de tamaño 1 (alud pequeño o colada) y tamaño 2 (alud mediano), se pueden sufrir severos daños personales.
