PM:

Tendency: Constant avalanche danger →
on Wednesday 30 04 2025

Wet snow

2800m

Snowpack stability: **poor**

Frequency: **some**

Avalanche size: **small**

The danger of wet avalanches will increase during the day.

As a consequence of warming during the day and the solar radiation, the likelihood of wet avalanches being released will increase. The avalanche prone locations are to be found especially on very steep west, north and east facing slopes below approximately 2800 m. In the afternoon the activity of wet avalanches will increase, in the event of rain especially. Mostly avalanches are only small.

The wind slabs are now only very rarely prone to triggering. Individual avalanche prone locations are to be found in particular on extremely steep shady slopes in high Alpine regions and adjacent to ridgelines and in gullies and bowls. Mostly avalanches are only small.

The Avalanche Warning Service currently has only a small amount of information that has been collected in the field, so that the avalanche danger should be investigated especially thoroughly in the relevant locality.

Snowpack

Danger patterns

dp.10: springtime scenario

dp.3: rain

In some regions a partly clear night. The surface of the snowpack will only just freeze and will soften during the day. The old snowpack is wet. This applies on shady slopes below approximately 2800 m, as well as on sunny slopes below approximately 3200 m. Up to the high Alpine regions rain will fall in the afternoon in some localities.

Tendency

In some regions a clear night. The surface of the snowpack will only just freeze and will soften during the day. Mostly avalanches are only small.

Danger Level 1 - Low

Tendency: Constant avalanche danger →
on Wednesday 30 04 2025

Low avalanche danger will prevail.

Only isolated avalanches are possible.

Snowpack

A partly clear night. The surface of the snowpack will freeze very little and will soften quickly. The old snowpack will be wet all the way through.

A little snow is lying.

Tendency

Only isolated avalanches are possible.
