

## Danger Level 1 - Low

**Tendency: Constant avalanche danger** →  
on Friday 28 11 2025

New snow

Some snow has fallen since Wednesday. The new snow represents the main danger.

Mostly small natural avalanches are possible in high Alpine regions.

### Snowpack

New snow above approximately 1000 m. The new snow can be released naturally in all aspects above approximately 1400 m. In many cases new snow is lying on a moist old snowpack.
