

## Danger Level 1 - Low

**Tendency: Constant avalanche danger** →  
on Monday 22 12 2025

Wet snow

2000m ✓

Persistent  
weak layer

2000m ^

Moist snow slides and avalanches are possible in isolated cases.

Until the temperature falls individual mostly small wet avalanches are possible as the day progresses.

### Snowpack

The snowpack will be subject to considerable local variations below approximately 1800 m. The surface of the snowpack will freeze to form a strong crust only at high altitudes.
