

Danger Level 1 - Low

Tendency: Constant avalanche danger →
on Friday 28 11 2025

New snow

1400m

Some snow has fallen since Wednesday. The new snow represents the main danger.

Mostly small natural avalanches are possible in high Alpine regions.

Snowpack

New snow above approximately 1000 m. The new snow can be released naturally in all aspects above approximately 1400 m. In many cases new snow is lying on a moist old snowpack.
