

Danger Level 2 - Moderate

Tendency: Constant avalanche danger →
on Tuesday 25 11 2025

Wind slab

Snowpack stability: **very poor**

Frequency: **few**

Avalanche size: **medium**

Wet snow

Snowpack stability: **very poor**

Frequency: **few**

Avalanche size: **small**

Small and medium sized avalanches and wet avalanches during the day are possible in isolated cases.

In very isolated cases the avalanches are medium-sized. In particular, however, the wind slabs should be taken into account.

Snowpack

As a consequence of snowfall and the occasionally moderate northeasterly wind, fresh snow drift accumulations formed on Saturday. Significant warming to below 1800 m.

Danger Level 1 - Low

Tendency: Constant avalanche danger →
on Tuesday 25 11 2025

Wet snow

Snowpack stability: **very poor**

Frequency: **few**

Avalanche size: **small**

Moist snow slides and avalanches are possible in isolated cases.
Mostly the moist avalanches are small.

Snowpack

Significant warming. The weather conditions will give rise to increasing moistening of the snowpack over a wide area.
