Wind slab

Treeline

New snow

Treeline

The new snow and wind slabs represent the main danger.

Error: Incomplete joker sentence

Snowpack

In particular in the western Prealps 10 to 30 cm of snow, and even more in some localities, will fall. The wind will be strong for a temporary period in some regions. The fresh wind slabs will be deposited on the unfavourable surface of an old snowpack on wind-protected shady slopes. The old snowpack will be subject to considerable local variations.

Tendency

Some snow will fall in some localities.
