Wet snow

### Error: Incomplete joker sentence

Moist and wet snow slides are possible in isolated cases. There is a danger of falling on the hard snow surface.

### Snowpack

A little new snow at high altitude. The weather conditions gave rise to significant settling of the old snowpack.

## Danger Level 1 - Low

**Tendency: Constant avalanche danger** on Thursday 22 01 2026 →

Moist slab avalanches are possible in isolated cases as before.

In particular shady places that are protected from the wind as well as transitions into gullies and bowls: Here slab avalanches are possible, but they will be mostly small. There is a danger of falling on the hard crust.

### Snowpack

The snowpack is largely stable. It is fairly homogeneous and its surface has a crust that is strong in many cases.

At low and intermediate altitudes hardly any snow is lying. A little new snow at intermediate altitudes.
