

Danger Level 2 - Moderate

Tendency: Decreasing avalanche danger
on Sunday 28 12 2025

Wind slabs and weakly bonded old snow require caution. Significant warming.

Error: Incomplete joker sentence

Snowpack

Danger patterns

dp.6: cold, loose snow and wind

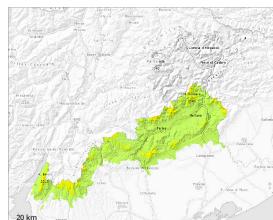

In some regions 5 to 15 cm of snow, and even more in some localities, fell on Wednesday above approximately 2000 m. The fresh wind slabs are lying on unfavourable layers on wind-protected shady slopes. The conditions will facilitate a gradual stabilisation of the snow drift accumulations. The old snowpack will be subject to considerable local variations.

Tendency

As a consequence of the strong northerly foehn wind, fresh snow drift accumulations will form.

Danger Level 2 - Moderate

Tendency: Constant avalanche danger
on Sunday 28 12 2025

Wind slabs and weakly bonded old snow require caution. Significant warming.

Error: Incomplete joker sentence

Snowpack

Danger patterns

dp.6: cold, loose snow and wind

In some regions 5 to 40 cm of snow fell on Wednesday above approximately 1600 m. The fresh wind slabs are lying on the unfavourable surface of an old snowpack on wind-protected shady slopes. The conditions will facilitate a gradual stabilisation of the snow drift accumulations. The old snowpack will be subject to considerable local variations.

Tendency

As a consequence of the strong northerly foehn wind, fresh snow drift accumulations will form.
