

AVALANCHE BULLETIN - ISSUED AT on 29/11/2023 by Servizio METEOMONT dell'ARMA dei CARABINIERI in collaboration with Italian Air Force Meteorogical Service

WARNING - SIGNIFICANT AND/OR INTENSE PHENOMENA

Attualmente sono presenti, sui settori meridionali, circa 5-10 cm ai 2500m. I quantitativi aumentano progressivamente procedendo verso nord, con circa 10-20 cm a 2500 sui settori occidentali e 15-30 su quelli settentrionali. In alta quota, il vento ha contribuito a rimaneggiare notevolmente il manto, determinando un innevamento molto discontinuo, con ampie superfici in prossimità delle creste e formando i primi accumuli sui versanti sottovento e all'imbocco dei canali. For further information and details on weather forecasts and conditions please refer to www.meteoam.it

According to EAWS standards Meteomont bulletin is a synoptic-scale system (regional scale). It shall be the user's responsibility to correlate the danger level evaluation of the bulletin with a detailed and expertise analysis of the zonal hazards (single slope), that could be markedly different. Meteorological forecast are issued at UTC (for Italy: in winter time UTC+1: in summer time UTC+2).
