# **WARNING - SIGNIFICANT AND/OR INTENSE PHENOMENA**

Copertura nevosa continua seppur con esigui spessori di neve dai 1600 mt slm. Alle alte quote, la neve di precipitazione è stata ridistribuita dai forti venti orientali e nord orientali. Il pericolo maggiore sarà legato alla formazione di insidiose placche ghiacciate predisponenti a cadute. Per le escursioni in montagna si consiglia l'uso di attrezzature adeguate.
