

AVALANCHE BULLETIN - ISSUED AT on 11/12/2023 by Servizio METEOMONT dell'ARMA dei CARABINIERI in collaboration with Italian Air Force Meteorogical Service

WARNING - SIGNIFICANT AND/OR INTENSE PHENOMENA

Il manto nevoso presente a 2000m ha i seguenti spessori: settori meridionali:10-20 cm; settori occidentali: 20-35cm; settori settentrionali 25-60cm. In alta quota, il vento ha contribuito a rimaneggiare notevolmente il manto, determinando un innevamento molto discontinuo, con ampie superfici erose in prossimità delle creste e formando accumuli sui versanti sottovento e all'imbocco dei canali. For further information and details on weather forecasts and conditions please refer to www.meteoam.it
