

10

The avalanche conditions are mostly favourable. As the temperature drops there will be a decrease in the danger to level 1 (low). Gliding avalanches can be released at any time of day or night. Even during the day small moist snow slides are possible. This applies in particular in case of very steep starting zones.

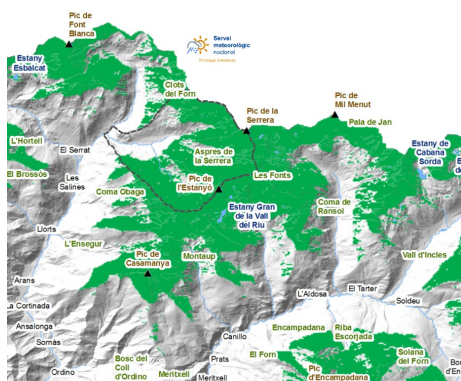

New snow is lying on an icy crust. In steep terrain there is a danger of falling on the hard crust. As a consequence of solar radiation the snowpack consolidated. Caution is to be exercised in areas with glide cracks. At high altitudes and in high Alpine regions the amount of snow is subject to significant local variations.

Friday : Down to intermediate altitudes snow will fall in particular in the north.

North zone					Center area					South zone				
		Snow thickness					Snow thickness					Snow thickness		
Snowpack		1500m	2000m	2500m	Snowpack		1500m	2000m	2500m	Snowpack		1500m	2000m	2500m

Detailed information for protected areas

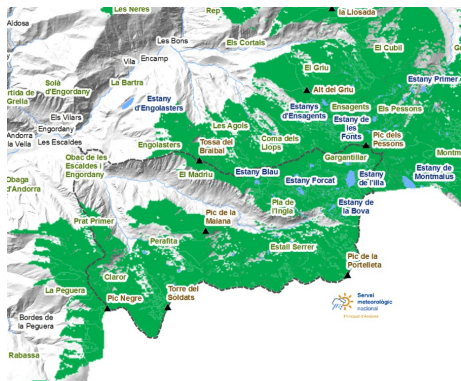

SORTENY

With the drop in temperatures and new snowfalls, although they are weak, the situation has changed slightly. On top of the old snow we find a thin layer of recent snow that, despite freezing, facilitates both the ascents and the descents, but we will have to continue to carry knives or crampons to climb the steeper slopes. The snow is still continuous on the northern slopes of the Ransol, Sorteny and Rialb valleys, although we will have to make some approaches on foot.

COMAPEDROSA

The new snow on the surface, while newer, is also frozen and some wet snow flurries may break out on the steeper slopes in the afternoon. In general, we will find continuous snow above the Pla de l'Estany and the Comapedrosa refuge. The thickness of snow is the usual for this time of year, with numerous routes that can still be done with mountain skis between Andorra l'Ariège and Catalonia.

MADRIU-PERAFITA-CLAROR

The accesses to the Valley from Montmalús continue to have good snow and with similar conditions everywhere. There is still snow on the southern slopes of Engait, Picos Negres d'Envalira and l'Illa which allow you to connect with El Madriu, Grau Roig and Pas de la Casa.
