SNOW QUALITY

The avalanche conditions are mostly favourable. As a consequence of new snow and a moderate wind, small wind slabs will form in the course of the day adjacent to ridgelines on northeast, east and south facing slopes. In many cases they are small and in isolated cases easily released. Gliding avalanches can also occur at any time. This applies in particular in case of very steep starting zones.

STABILITY OF THE SNOW MANTLE

Friday : Down to intermediate altitudes snow will fall in particular in the north. The moderate wind will transport the new snow. New snow is lying on an icy crust. In steep terrain there is a danger of falling on the hard crust. Caution is to be exercised in areas with glide cracks. At high altitudes and in high Alpine regions the amount of snow is subject to significant local variations.

OFF-PISTE SNOW COVER THICKNESSES

North zone		Snow thickness			Center area		Snow thickness			South zone		Snow thickness		
Snowpack		1500m	2000m	2500m	Snowpack		1500m	2000m	2500m	Snowpack		1500m	2000m	2500m
N	2100 m	0 cm	0 cm	100 cm	N	2100 m	0 cm	0 cm	100 cm	N	2100 m	0 cm	0 cm	100 cm

Detailed information for protected areas

SORTENY

With the drop in temperatures and new snowfalls, although they are weak, the situation has changed slightly. On top of the old snow, thin sheets of windy snow will form, of a thickness that will facilitate the ascents and descents, but we will have to continue carrying knives or crampons to climb the steeper slopes. The snow is still continuous on the northern slopes of the Ransol, Sorteny and Rialb valleys, although we will have to make some approaches on foot.

COMAPEDROSA

In general, we will find continuous snow above the Pla de l'Estany and the Comapedrosa refuge. The thickness of snow is the usual for this time of year, with numerous routes that can still be done with mountain skis between Andorra l'Ariège and Catalonia.

MADRIU-PERAFITA-CLAROR

The accesses to the Valley from Montmalús continue to have good snow and with similar conditions everywhere. There is still snow on the southern slopes of Engait, Picos Negres d'Envalira and l'Illa which allow you to connect with El Madriu, Grau Roig and Pas de la Casa.
